Comments: The Rattlesnake Wilderness is such a unique area. We are blessed to have it. I object to the proposed changes. It is important to maintain the Rattlesnake's primitive character as Congress intended it to be in the 1980 Rattlesnake Act. Provide the Rattlesnake National Recreation Area with its own management area and keep the standards from the 1986 Lolo NF Plan and the 1992 Rattlesnake Limits of Acceptable Change Management Plan. Maintain the existing roads and do not build new roads. Attempts to commercially log the Rattlesnake will completely destroy the primitive character of the wilderness as Congress intended it in the 1980 Rattlesnake Act. It's better to rely on hand work and prescribed burns. The preservation and enhancement of the recreation resource should be the number one management objective
