Comments: Please do not change how the Rattlesnake National Recreation Area has been managed since its inception. Please do not allow logging, road building, grazing, or concentrated recreation areas (such as ski areas, etc.). Prescribed fires, hand thinning and slash burning are appropriate methods of fire risk mitigation for that natural area. Please continue the "light handed" management approach that has guided management of that area. I live near and recreate regularly in the RNRA and have for many years. It is a very special place not only for me but for all Missoulians and visitors. I appreciated the opportunity to provide input.
