Comments:

I support the designation of a Semi-Primitive Non-Motorized setting for our favorite local spots at Lolo Pass, Hoodoo Pass, Saint Regis Basin, Wisherd Ridge, Marshall Mountain, and Morrel Mountain. These popular areas provide opportunities for accessible human-powered backcountry skiing/riding day trips on public lands. Once you make these places motorized acceptable, you ruin a part of the quiet woods experience. There is few and far between places left. Let's protect them before they're all gone.
