Comments: Thank you for putting so much effort into this proposal.

I am a firm believer in keeping space dedicated to wildlife and low impact recreational activity. The Arizona trail needs to be preserved from any and all high impact, commercial activity that doesn't directly support and sustain the native wildlife and community which the Arizona trail follows. It would be great to see the Arizona trail exist in perpetuity, and any land which it follows should belong to the association that maintains its existence and access to all, granted the association is in good standing with the community, board, and members.
