Title:

Comments: I strenuously OPPOSE the proposed timber sale of ~12,000 acres that is part of the management plan for the Green Mountain National Forest's Telephone Gap Integrated Resource Project. I worked for a regional watershed association for 25 years and am thus familiar with forest management plans and their need. This one however is one of the worst and has considerable negative consequences including (but not limited to) water quality, habitat biodiversity and carbon sequestration and storage. Please leave this maturing forest roadless and unlogged at least for this next management time period.
