Title:

Comments: To Whom it may concern,

I oppose the Telephone Gap logging project. It is well documented that mature trees are best left alone. They are our best hope against and maybe our only hope to fight climate change. I know the Forest Service is a big organization and has been in the logging business for a long time and depends on logging projects for financi. But I hope that you can change the way you have been doing business and think out of the box to help save our planet.

Thanks

Gerry
