Comments: I am apposed to this project 100%. First there is no crises as to wildfires due to the B.S. Climate Crises, our Shoshone forest has been mismanaged by the USFS for centuries! You have restricted logging, closed access roads, restricted access all while allowing the btu's of dead timber, beetle killed trees, blown down tress to reach levels never seen before! Through your management you have created the problem, and now are trying to implement an unrealistic, half assed, management plan to try and resolve the threats you have created. We the citizens of Wyoming would be better off managing the federal lands within our state boundary. It is a shame to see how far the USFS has declined into what it is today. So very sad!
