Title:

Comments: Please establish a separate Management Area for the Rattlesnake National Recreation Area (RNRA), one that keeps the standards from the 1986 plan.

The RNRA is the only Congressionally designated RNA in the FS Northern Region. It's a big deal. It has its own Management Area, and should continue to have one, not the three less restrictive ones proposed. This special area must stay closed to logging and road building. The history and significance of this area should be of top consideration.

Thank you
