Comments: I am submitting comments to keep the protection for the Lolo forest, especially the Rattlesnake NRA. Keep the restrictions that have been in place for the last few decades in place. Do NOT revise the forest management plan to allow motorized vehicles as this change significantly reduces both wildlife and human recreation in this area. There exist numerous areas in the current, existing forest plan for the Lolo forest such as Blue Mountain near Missoula for motorized travel and recreation. No additional motorized vehicles should be allowed in the RNRA. Nor should roads be built in these areas where they don't currently exist. Please respect the environment, wildlife and citizens that do not want alterations in the management of these forests from how they are currently done.
