Title:

Comments: I am strongly opposed to the Telephone Gap logging project. As someone who teaches Climate Change and Planetary Health, I know that protection of our New England Forest Resources is essential to protecting our planet, our ecosystems, our atmosphere from the effects of climate change. We know that 2023 was the hottest year on record and we remove chunks of our N.E. forests at our own peril.

Please help stop this senseless project to look Telephone Gap.

Susan Murcott
