Comments: Hello - pieces of trail connections like this are important as they allow people to get out from their houses and help manage social trails that pop up when that access isn't there. This is a great example of multi-partner work to get a small needed stretch completed.

There have been 3 fatalities, in the past 3 years, of locals on bike and foot along the short, dangerous stretch of US-6 that this connector would allow people to bypass. Anything we can do to provide alternate, safer route for nonmotorized traffic is important for the safety of our community.
