Comments: Dear Forest Service:

The Great Burn area of Lolo NF must continue to be managed as wilderness. I hike, camp and fish in this area and understand and respect the wildness it offers. This bioregion has to be preserved as a bulwark against climate change. We have a chance to protect the Great Burn still, let's keep up the pace and not squander a great opportunity to ensure the well-being of wolverines, grizzlies, and ultimately - ourselves.

Best Regards,

Erik Benson
