Comments: Overall the plan update is good as far as I know, lots of hard work.

My comments are:

- 1) I object to any further addition to wildlife study areas (WSAs). We have enough area for people to walk and get lost in. They don't need any more acreage.
- 2) I would like to see more existing FS roadways open in the summer for OHV access to ride (for those that can't walk 10-15 miles) through the forest and view scenic places. It would be great if some 50 mile loop rides were created/available. In and backout the same way are OK if that is all that is possible. So open more gates for the summer.
