Comments: This trail extension would be a great addition to the trail system. It would be much safer and lower impact than the current renegade trail that traipses thru private property. The more trails we have that don't require time on the hwy will lower bike/vehicle interaction and potential accidents and minimize shuttles. As a resident of Eagle Vail, I know this trail is used frequently and the locals love the easy access to the trail. It is one of the reasons we live here- to have a trail in the backyard is really special and a huge selling point for properties here.
