Comments: I fully support the westward extension of the EagleVail Trail in its current proposed form. As a former resident of EagleVail for 15 years on the far west side of Deer Boulevard, I did numerous hikes in the area of the proposed trail. Indeed there are many ribbons of different social and/or animal trails, depending on where the trails originated. Would be much more sustainable to create a single strong trail, and provide access and opportunities for others on the west end of this proposed extension to utilize the trail network.
