Comments: I am a big fan of the trail extension of the Eagle Vail trail to the west. My family and I use the current trail 4-5 times per week and love the ability to get off the valley floor and into the cool north facing slope traversing through pine and aspen forests. The ability to continue a soft surface trail west provides all sorts of recreational opportunities, keeping us out of our cars and off of hwy 6 on our bikes.

I enthusiastically support the extension.
