Title:

Comments: I am an equestrian trail rider. I ride in both Washington. and Oregon. We are losing trails all the time. It is important to open new trails to replace the ones being closed to development and natural disasters. Since this trail is already being used by Endurance riders, it should be easy to open to the public. With so few new trails being established, this would be beneficial to a wide group of trail users.

Thank you for the opportunity to address this issue and request that this new trail be established for public use.
