Title:

Comments: I am an equestrian trail rider from Salem, and I am in support of the project that would designate about 50 miles of system trails using the route established by the Bandit Springs Endurance Ride.

Being able to ride my horse on the trails on our public lands is important to me as is reversing recent closures to horse riding. I support keeping local equestrian trail improvement and development projects on track.

Please allow access to public lands for equestrians, both improved and unimproved trails for horseback riding.

Thank you for your consideration.
