Title:

Comments: I am writing to comment on a few items related to revisions of the Lolo NF Management Plan. In general my comments are in support of decisions that will allow me to Mountain Bike in areas that I have been using for more than 30 years.

Heart Lake Loop/Stateline Trail - I am strongly opposed to any revision that will designate all trail in the area as Recommended Wilderness. Any revision should include a non-motorized travel corridor to be established on these trails. I believe the Lolo NF and Nez Perce-Clearwater NF policies should be aligned.

Carlton Ridge to Mill Creek on Lolo Peak. - I support the recommendations for the Lolo Creek Geographic Area.

Cube Iron Roadless Complex - This area should be managed as a backcountry designation will maintain primitive characteristics, but allow mountain bike access.

Blackfoot Clearwater Stewardship Act - The recommended action does not follow the BCSA boundaries that were developed with extensive community involvement. I support the BCSA.

In general I am opposed to actions that limit the use of mountain bikes.
