Comments: Thank you for the opportunity to provide input. My specific comments relate to the cross country and snow mobile trails at Lolo Pass. It is such a wonderful place to ski, both classic and skate but we need to have consistent grooming and consistent early morning messages from the staff at the lodge up there so that we know if it has been groomed. The needs of classic skiers and skaters are different but we can both use the same trail system if the grooming needed for each has taken place. The use of the area is extensive, even during the week and so it would be very beneficial to have increased grooming, better communication about conditions, and as an added wish, more trail added for skiers. Thank you again,
