Title:

Comments: I am submitting comments specific to four areas:

I opposed the Heart Lake Loop being recommended for a Wilderness designation unless a non-motorized travel corridor is established. I understand the challenge of this trail going back and forth across the MT/ID state line and hope mountain bike access will be allowed on both sides of the line.

I support the recommendation for Carlton Ridge to Mill Creek to remain open to bikes.

I support the backcountry management designation for the Cube Iron Roadless Area, near Thompson Falls which as I understand it will maintain primitive characteristics while allowing for bike access.

I hope the future management of the Rattlesnake Recreation Area is in keeping with the way it's been historically managed in regards to roads, access, and logging.
