Comments: The forest service also partners with the Wyoming State Forestry, Bureau of Land Management and more.

The USDA Forest Service aims to treat several thousand acres of national forest through mechanical and manual fuel reduction, prescribed fires, and tree planting.

"The reason for this is that our project area of over 11,000 acres has uncharacteristically high fuel loads. So, either of these means or all of these means together will hopefully reduce that and create a more defensible space," said Patrick Champa, Bear Lodge District Ranger, Black Hills National Forest.

ARE YOU SERIOUS??? YOU FORGOT TO MENTION PARTNERING WITH THE LOGGING INDUSTRY
ITS THE YEAR 2024

YOUR PRACTICES ARE ARCHAIC, DONT REFLECT ANY NEW UPDATED SCIENTIFIC OPTIONS FOR THE
MAN-MADE CLIMATE CHANGES. NOT FIRE PREVENTION- YOU'RE SELLING OUT TO LOGGERS.
LEAVE THE OLD GROWTH FORESTS ALONE IDIOTS.

YOU ARE SUPPOSED TO BE STEWARDS OF THE FORESTS & PUBLIC LANDS.

YOU SHOULD BE CONSULTING NATIVE AMERICAN INDIANS,. THEY ARE TRUE STEWARDS.

YOU PEOPLE ARE OLD. NEANDERTHAL THINKING MALES WITH NO INTENTION OF DOING ANYTHING
DIFFERENT FROM THE 1900S
