Comments: I support making the Corral Flat Endurance Trail an official hiking and equestrian trail only. It is important that all forms of public land recreation are available to outdoor enthusiasts. In today's fast paced world there are a shrinking number of front country trails that are safe for foot traffic and family and equestrian use. If we are to encourage today kids to get out and enjoy their public lands, it is imperative that we have trails that are suitable and safe for us to introduce young children to the joys of hiking, running or horse back riding on trails.

Bicycles and ATVs travel a speed that is frightening and dangerous for equines and other foot traffic, especially on single track and limited visibility trails and need to be separated from foot traffic users on many of these trails. I support increasing the number and variety of trails for bikes and ATVs to encourage a separation of wheeled and foot traffic.

Please consider making the Corral Flat Endurance Trail an equestrian and foot traffic trail only.
