Comments: I strongly oppose the trails around heart lake to become recommended wilderness. I strongly support the recommendations for the lolo creek geographic area. For the Cube Iron Roadless complex I strong support the recommendation for a backcountry designation in this area which will maintain primitive characteristics while allowing for bike access. I support the BCSA as was drafted via coalition and submitted by Senator Tester for congressional action. This provides mountain bike access on center ridge and creates trail development potential into otatsy lake area. I do not oppose the additional wilderness at Quigg Peak, though some less popular trails may be lost. I support the backcountry management on Stony Mountain to retain access and to ensure a bike-travel connection between the lolo, bitterroot, and beaverhead deerlodge NFs. I appreciate and support the progressive actions for the greater Missoula Geo Area as they are aimed at improving access and connectivity both to and within the forest. We continue to remain hopeful that the user created trail system accessed via dry gulch road will transfer to pulic ownership and offer additional trail recreation. Please get Deep Creek developed, such a great segment of terrain. Support for all bike positive initiatives as long as e-bikes aren't included.
