Comments: As a resident of Eagle County, I am writing to express my concern with the proposed extension of the existing EagleVail Trail 1.64 miles to the West, ending at the entrance to Beaver Creek. The EagleVail Trail has decimated wildlife in the area already, the addition of another 1.64 miles could exacerbate the situation further. The residents of Eagle County have expressed their desire for wildlife interests to be the top priority to ensure wildlife continues to be a part of our community. This trail extension could serve to further the decline of critical habitat which is counter to our community priority. Any negative impacts to wildlife must be considered and prioritized as a part of this process. Thank you for your consideration.
