Comments: I have reviewed the thinning project as well as i am a landowner next to units 19, 20 and 21. I strongly agree and want to see this thinning completed in an effort to help create a safer forest and help protect mine and my neighbors houses from fire. As a landowner next to forest service ground it is imperative that KNF do their part to protect my home and more important is the safety of my family, neighbors and those involved if a forest fire presents itself.
