Comments: Thank you for your efforts to-date putting this all together. I haven't found any issues that I think you have missed except possibly water quality as a stand alone. I sit on the Western Montana Conservation Commission and we are charged with maintaining or improving water quality on all waters west of the Continental divide in Montana. A lot of that water is in your Forest. I would ask to have standing to be part of upcoming administrative reviews involving water quality.

I am on WMCC because as a Montana resident I am concerned about declining water quality.
