Comments: I am in favor of this project for many reasons. Primarily, completing this trail system and solidifying established routes will reduce the amount of improper trail use in the area. The trail system has been implemented well and I use it multiple times per week in the summer. The unfortunate reality is that these trails will be used whether or not the project is approved, so I hope the forest service will work with the trail association to continue offering wonderful and appreciated access to these areas. People will respect their environment the more they get to experience it. Thanks
