Comments: AS a lifelong users of the rattlesnake (58 years) I strongly encourage you to allow E-bikes in RRA. They do do no resource damage, offer quiet recreation to other users and provide aging people access to the recreation area. This area allows motorized use currently and the corridor was originally intended for motorcycles to access the back country. I first was taken to carter lake as a baby in a pickup truck in the 60s, when that was closed to vehicles my father bought motorbikes and snowmobiles to use the area. When motor bike access was closed in i believe 1983, I bought 1 of the first mtn bikes to use in the area. Now my knees are shot and the technology has changed to E-bikes and i feel there is no reason to not allow there use.
