Title:

Comments: I never thought that Vermont National forests would be clear cut. I am horrified at the prospect, not just because it is wasteful and damaging to the environment but because it will make any future that more difficult. Any one with children should try to make their lives better not worse. Flooding is real, as are the extinctions of wildlife such insects. granted, they are at the bottom of the food chain, but we are playing a big game of Jenga when we pull out the bottom tier. When we mess with ecosystems, it is our demise. I strongly request that this action be stopped.
