Comments: I would like the USFS to keep what's already open and available for OSV/OHV use alone. If the USFS is using ESA for future closures, there have been several studies that indicate motorized vehicles have no effect during hibernation/denning periods.

I'd also like to see the USFS make more public access, fewer closures and open additional recreation areas.

The land that is designated open for public access needs to stay that way. NO MORE WILDERNESS areas. At the rate we're going people will have to walk 10-15 miles to find any animals to harvest during hunting seasons.

I'd also like to see IRA's be put back into general forest management, which will open up logging, mining and motorized recreation, etc.
