Title:

Comments: Please DO NOT let this extension happen. I live in a house directly below the proposed new trail and have basically grown up in these woods. I am a high school student and me and my friends spend lots of time hiking and exploring behind our houses. This would not only be a disruption to my family and our neighbors privacy, but would also get rid of the woods which so many of our memories have been made within. The current eagle vail trail runs above mainly golf course while the proposed extension is directly behind many peoples property. As it is right now, we already have a few confused tourists wondering through our backyard to get back to their airbnb's. But if the new extension is put in, this number will increase and our privacy will be all but gone. This new trail will have very little benefit to the people of Eaglevail and is disruptive. Me and many of my neighbors families stand against this decision.
