Comments: Please change the way you are managing wild horses and start caring about the herds under your care and protection. Helicopters and holding pens are not the answer. Wild horses can help manage the wild grass lands and prevent fire. I don't want my tax dollars spent killing and harassing a great American symbol . You work for all of the American people, not just ranchers. Contraception using injection is safe and effective while crushing ovaries. is dangerous and can be lethal. 50 years have gone by since I began asking you to help and protect, not corral and kill wild horses. The public wants wild horses on wild lands; please listen to us.
