Title:

Comments: The plan includes substandard restoration goals and vague and/or insufficient goals and objectives related to maintaining adequate stream flows through water storage. I support including in this plan the utilization of a variety of storage tools (both natural and man-made) that increase our ability to capture and preserve crucial water supplies for use during the hottest, driest months. The plan places little focus on protecting vulnerable native species. I am concerned with the proposed allowance of motorized recreation in the Rattlesnake, LaValle, and Butler Creek watersheds.

I would support inclusion of grooming access on the Montana side of Lolo Pass, specifically expansion of groomed nordic ski trails between Lee Creek Campground and Lolo Pass. I would also support improved and expanded parking infrastructure at Pattee Creek.
