Comments: In addition to the climate benefits, our forests are home to so many of our critters and birds. Can we please stop taking down their homes for our own needs? How about we prioritize wildlife before humans for once? Please put Telephone Gap on hold at least until early 2025, when the US Forest Service will do a nationwide Forest Plan amendment process. The current GMNF Plan that Telephone Gap is based on was done in 2006 before much of the current best science on climate and forests had been done. Thank you.
