Comments: This is wonderful! I've ridden these trails both for pleasure and during the endurance competitions. There's enough options that it's hard to memorize the trails and we get lost occasionally so having marked trails is a big safety benefit in an area with no cell phone service. Even though I don't mind sharing trails with bikes there are some areas that make this less safe (for both users!) and I think it's great that these would be hiker/horse trails.

Thank you so much for the effort!
