Comments: The extension of the Eagle vail trail sounds like a good idea but this would have negative effects such as traffic near wilderness trails. There are many animals that roam in these areas in peace without human disturbance, the eagle vail trail is fine as is and does not need to be extended. This trail also would run right past my backyard, i have gone up there and people can see clearly into my room and house. That makes me uncomfortable thinking about people being able to see in my room when i am doing things such as changing, sleeping, or waking up, i prefer to use natural lighting in my room to save energy so my blinds are always open. I am a 14 year old girl and my high school friends also live near me and we wouldn't appreciate it if the trail got extended past our houses.
