Comments: Great project! I own land on the northern boundary of the proposed project. I will cooperate any way that I can to help the FS implement the project.

From our boundary with the FS going south until you break out on Hay Flats needs a great deal of clearing and fuels reduction. The northern facing slope is just a mess of down timber and is just about impossible to navigate through it on foot. It has a huge fuels load. I would hope you start at the northern edge of the project and work south.

I am very glad that the FS is looking at doing some work in that area! If you need access through our property please get in touch with me and we will be happy to work with you!

Please hurry up! I'm 80 years old and would like to see some progress made up there!

Congratulations on being pro active!

Thank you,

Mike Grady
