Comments: This project would be a huge benefit to the community, especially when it comes to public safety.

Currently, trail users coming from north of US 6 have to cross that highway in order to access the trail, with the most direct route being one without any sort of designated crossing. The highway has only become busier and more dangerous in the past several years and has seen fatalities as recently as in the past few weeks. With this project, pedestrians and cyclists would be able to utilize the existing crosswalk and roundabout at Beaver Creek to access the trail. It's not an understatement to say that this project will likely save lives and livelihoods.
