Comments: I am writing in support of the Eagle Vail trail extension. As someone who regularly uses the Eagle Vail trail and surrounding trails for running and biking I am excited for an extension, adding additional length to the exist trail. I also look forward to being able to access Beaver Creek without accessing the highway.

More personally, my husband and I own a duplex at the far west end of Eagle Vail, right below the current social trails. Adding a formal trail, higher on the hillside with signage acknowledging the private property below and entry/exist points should address neighborhood concern with trespassing on private property as the current social trails which have seen more use in recent years cross through private property in many cases.
