Comments: To NPS

I am writing again to express my opposition to the Telephone Gap Integrated Resource Project.

I want to make it absolutely clear that any tree removal Or other soil disturbance involved in the Telephone Gap Project and others, will most definitely bring invasive plants into the woods, fields, roads, streams, and ponds with in the project area and spread to all of the neighboring lands. Soil Disturbance and Sunlight mixed with Rain set the stage for the spread of these invasive plants by all creatures great and small including MAN! No IFs Ands Or Buts. It's a red carpet for Chervil, Buckthorn (Glossy and Common), Bittersweet , Poison Ivy, Poison Parsnip, Phragmites, Gout weed, Japanese Knotweed, Giant Hogweed, Stilt grass, Honey suckle, Barberry, Multiflora Rose, Yellow Flag Iris ETC ETC! And let's not forget The Jumping Worms. They are here and happy to join the disturbance party!
