Comments: As a home owner in the west end of EagleVail and avid mountain biker in the area, I have to ask why is this project a focus of VVMTA and EV metro district? The Oso trail was officially decommissioned last year for wildlife habitat but another trail is being built in the same area. What it will do is bring more traffic to the area behind people homes from Avon. It seems be more of a 'convenient' trail system and marketing for the new development at Frontgate. It just doesn't doesn't make any sense to take the time to build out that trail when people can use the current trail head at grouse court and travel highway 6 to connect trails. There's other work to be done in the valley for single track trails than focus on the extension of the Eagle vail trail in a wildlife sensitive area.
