Title:

Comments: If the USFS is behind this project then it's legit. The local crew who manages the Green Mountain National Forest are pros and only want the best for the State of Vermont. The attention to detail put in to manage the Forest Habitat and Timber, as well as the soils and wetlands showcases the thoughtful approach to this project. Movement through this special area has been addressed. Erosion mitigation will be enhanced with waterbars and additional culverts. All of this work will allow more Vermonters and those who visit Vermont the access to recreate in this location without disturbing the land. The addition of a Hut, connecting the Velomont Trail, new MTB Trails and scenic outlooks will help the expose the natural beauty of the Green Mountains and drive much needed local economy. EveryBODY deserves the opportunity to play in the Green Mountains of Vermont.
