hi Amanda,

Im forwarding this message from the Fungi Foundation, Marios Levy is a program coordinator.

In addition to mentioning National Geographic, you mention also that the IUCN also calls for the protection and inclusion of fungi anytime the mention of plants and animals are found? Additionally, if you think it will be of more support, you can mention that there are thousands of signees who call for the mission of the Flora Fauna Funga initiative which similarly calls for the inclusion of fungi into policy frameworks including the US forest plan.

Marios Levy
