Comments: [External Email]Lolo Forest Revision Comment

Project Team-

I submitted a comment via the Lolo Planning website that came back denied due to the comment period being closed. According to the website comments are accepted until 4/1/2024 midnight.

Check the time you receive this email.

My comments, if they didn't come through:

* The proposed action mapping reveals approximately 80% closed to winter motorized use. What is the rationale for this action? Is there hard evidence of any adverse effects of winter motorized use? I strongly oppose the proposed closures.

* The available proposed action documents, area numbering, mapping, etc., seem to be missing vital detail, pertinent information, or contain inaccuracies. These discrepancies need to be rectified before the process can move forward. The comment period should be reopened at that time.

Thank you for this consideration.
