Comment on LNF Land Management Plan Proposed Action

1. This document is an excellent history document (ref Ch 3 lead-in paras). But that history is not suitable in an proposed action plan unless you tie in the specific history to a specific action. Example: We plan to make area xyz a camping area as the Indians found it convenient to camp there because of the water spring.
2. Ch 2 Pg 59 Objective para 03 states: [ldquo]Connect at least one non-motorized trail to existing trails to create loop rides or to connect to other parts of the trail network, per decade.[rdquo] This sentence makes no sense. Nonmotorized vs. ride? Did you mean for pedal bicycles? Please revise to read: Connect at least one OHV motorized shareable trail to existing trails to create loop rides or to connect to other parts of the trail network, per decade.
3. Make the document searchable with a FIND option tool. Example: I cannot find in the document what action you plan that affect OHV use.

Maybe more to as I have more time to read - it is a very complex doc to read for action. Perhaps I need some FS pub training.
