Title:

Comments: We live in Sandia Park, about 1.9 miles from the intersection of Frost Road and North 14. My wife is on oxygen 24 hours a day, and she has had pneumonia twice. Her health was compromised several years ago by the smoke from the fire south of I-40 in the Manzano Mountain area. This proposed burn would be much closer to us, and it is highly likely to further damage her lungs. I strongly urge you not to go ahead with this burn!
