First name: James

Last name: Latourelle

Organization:

Title:

Comments: We need the lumber industry in Vermont to take a more active role in the capturing of carbon

They can be better stewards of the forest than they have been

Large trees can not be replaced for nearly a century and we do not have that option for climate change is here upon us now.

Please vote to save "our" resources and demand we do our part in removing CO2 from our air

James Norton Latourelle
