Comments: I understand the Forest Service is planning to log stands of almost 12,000 acres of mostly old and mature forest in the Telephone Gap area of the Green Mountain National Forest just east of Pittsford. We all know old forests preserve our watersheds, protect biodiversity of critters and plants, and do the most to stop climate change. We need wood but we shouldn't cut more than we really need. We should preserve our public forests so they can continue to grow. Please save our old growth forests!
