Title:

Comments: I oppose allowing these shelters. Giving this access to private companies and organizations does not allow for the public to have access without the high costs of paying for these services only available to those who have the money to be able to pay a lot of money to a guide company to access these areas. This also gives unfair access to some guide companies vs others. It's unfair for everyone. In addition they will be benefiting from using taxpayer money paid facilities they will use in these areas.
